SUBJECT: Parachutes - DN 500 00-1 -- Serial Nos 5 - 10

Dear Ed:

All the changes discussed at the meeting at your facility in early November will be incorporated with the following exceptions:

Serial Nos. 5 & 6

Item 1 - Bottom pack tie down straps are not changed to one inch because [] could not obtain compatible adjusting hardware for the narrower webbing.

Item 2 - Steel cones are not supplied as this involves a new design and will not be available until S/N 11.

Item 3 - Wing flaps are not trimmed.

Item 4 - Wind blast flaps not incorporated.

Item 5 - Stainless steel rivets not used in pilot chutes.

Item 6 - Wing flap tabs not incorporated as Item 3 was not incorporated.

Serial Nos. 7 - 10

Same as above except Items 3, 4, and 6 will be incorporated.

As discussed with you on the phone yesterday, the need for Units 5 and 6 dictated that no more delay be encountered, therefore, Items 3, 5, and 6 have not been incorporated.

Jim:

Note that this deviates in
detail from the test schedule I left
with you last Wednesday
